

# Naples Municipal Airport

City of Naples Airport Authority - Naples, Florida

## ***Airfield Lighting & Signage:***

Hole Montes was responsible for the engineering services to rehabilitate the entire airfield lighting, signage and visual aids for the Naples Airport Authority. The new system included cables-in-conduit along with base mounted fixtures throughout the airfield. Visual aids included Precision Approach Path Indicators (PAPI); Runway End Identification Lights (REILs) and Omni Directional Approach Lights (ODALs). The project also included a new L-824 control panel in tower, lightning protection and new pole mounted ramp lighting.

## ***G.A. Terminal Parking Expansion:***

Hole Montes provided the engineering services for the design and reconstruction and expansion of the vehicle parking area for the G.A. Terminal. The new parking includes a walkway and drop-off canopy to protect the users from the environment.

## ***Corporate Hangars:***

HM was responsible for the coordination of the architectural design of the buildings and provided all site development design for the 40 Unit T-Hangars, 4 Corporate Hangars, 12 Unit Condominium Hangars, 7 Unit Condominium Hangars which included the complete design of aircraft fueling system for four corporate hangars at the Naples Municipal Airport. The 12,000 gal. jet-A dual wall full tank included filtration and pump systems to fuel helicopters, turbo prop aircraft and corporate jets.
