Phase IV Hangar / SE Ramp Expansion

Hole Montes managed the engineering services for the design and construction of the 68 T Hangars and expansion of 235,000 s.f. of ramp providing 70 aircraft tie downs. Project also included relocation of self-service fueler and a new self maintenance facility. A new water main was installed to provide fire protection for the improvements.

North Quadrant Development

Design of 40 acre parcel in the north quadrant of Page Field to support corporate and commercial hangar development. The project provides utility infrastructure, drainage and landscaping for 24 development lots. The project also includes 3 acres of lakes for surface water management. Phase 1A is currently under construction.

General Aviation Terminal Complex

Hole Montes provided engineering services from conceptual design through construction of a new G.A. terminal complex in the west quadrant of Page Field Airport. The complex includes a new terminal building, bulk hangar, parallel taxiway to two runways new apron along with access road and vehicular parking. The project also includes utilities, landscaping, signage and a new fuel farm. The taxiways were constructed in 2007 and the apron is scheduled for 2008.
