

School District of Collier County

CCPS - Naples , Florida

Hole Montes has provided survey and mapping, as well as engineering services, for more than 60 project sites for the District School Board of Collier County. Over the past two years, Hole Montes has conducted Boundary / As-built surveys of four Schools in Immokalee and four more in Naples. The Surveys of these schools included a 50 foot grid topo; location of trees; buildings; adjacent right-of-ways; and utility indicators, including inverts, pipe types and sizes. These surveys are to be used in the design of expanding the facilities. The schools for which Hole Montes has performed these most recent services include the District School Board of Collier County's Administration Complex and Satellite Transportation Maintenance Facility; Palmetto Ridge High School, Lake Trafford Elementary, Avalon Elementary and Poinciana Elementary School.

In addition to the survey and mapping services provided, Hole Montes provided cursory and detailed site studies on more than a dozen sites in District School Board of Collier. These sites are located in various areas of Collier County and range from less than 10 acres to more than 80 acres in size. The purpose of the studies was to evaluate the economic feasibility and physical constraints for development of District facilities including elementary, middle and high schools, transportation and maintenance facilities, new administrative offices, recreational and public park facilities, and printing and central warehouse facilities. Our studies concentrated on parcels owned by the District or those being contemplated for acquisition.

Sites were evaluated for important factors that influenced the potential for development. Adequate access to the site, critical for both educational and administrative facilities, was carefully considered. Not only was legal access evaluated, but surrounding local and arterial roadways were also evaluated as to their ability to provide adequate access.
